

HRISHIKESH SHREEKANT KOLLI

Software Engineer / Frontend Developer

Belagavi, Karnataka | 6363046691 | [Gmail](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE SUMMARY

Software Engineer with hands-on experience in frontend development, scalable web application development, REST API integration, and responsive UI engineering using JavaScript, React.js, Angular, HTML5, CSS3, and TypeScript. Skilled in developing component-based architectures, optimizing frontend performance, debugging application workflows, and building user-centric SaaS applications.

Experienced in integrating real-time databases, authentication workflows, and modern deployment platforms while collaborating in cross-functional development and testing environments. Decent understanding of SDLC methodologies, API handling, responsive design principles, and software engineering best practices.

Currently pursuing GenAI Powered Full Stack Development Fellowship at Crio.Do while strengthening expertise in modern web technologies, problem solving, and scalable application development.

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, SQL

Frontend Technologies: React.js, Angular, HTML5, CSS3, Bootstrap, Material UI, TypeScript

Backend & APIs: REST APIs, JWT Authentication, Supabase, Django

Tools & Platforms: Git, GitHub, Vercel, Netlify, Render, Linux

Core Engineering Concepts: SDLC, OOP, Data Structures & Algorithms, Debugging, Software Testing, Responsive Web Design

Core Competencies: Frontend Development, API Integration, Component-Based Architecture, UI Optimization, Authentication Workflows, Cross-Functional Collaboration, Performance Optimization

PROFESSIONAL EXPERIENCE

Navocent Pvt Ltd- Programmer Analyst | Remote | 2025

Project: DebateHQ (Real-Time Debate Platform)

- Designed and developed reusable, scalable, and component-driven UI modules using Angular and TypeScript to improve frontend maintainability and application responsiveness.
- Integrated Supabase real-time database and authentication workflows to enable seamless live interactions and synchronized data updates across application modules.
- Collaborated with cross-functional development and QA teams for debugging, feature enhancement, UI optimization, and validation of application workflows.
- Improved frontend architecture through modular component structuring, resulting in better scalability and maintainability of the application.
- Participated in feature implementation, UI testing, issue resolution, and software development workflows within collaborative team environments.

FUEL CSR- Python Trainee | Hubballi | 2024

Project: Digital Bus Pass Management System

- Developed a Python-Django based web application focused on streamlining digital bus pass management and improving public transportation accessibility.
- Built backend functionalities using Django framework and SQL database for secure data handling and workflow management.
- Collaborated with developers and testers to enhance application usability, functionality, and overall system performance.
- Contributed to debugging, validation, and feature optimization activities across different development phases.
- Worked on database integration, application logic implementation, and responsive workflow handling for commuter-oriented services.

PROJECTS

QKart (Ongoing) | React.js, REST APIs, JWT, Material UI

- Developing a scalable e-commerce platform using React.js with modular architecture, REST API integration, and JWT-based authentication workflows.
- Implemented secure user authentication, dynamic product rendering, cart functionality, and responsive UI components.
- Optimized frontend rendering, API handling workflows, and application responsiveness across multiple devices and screen sizes.
- Focused on reusable component architecture and improved user experience through structured frontend engineering practices.

QTrip Dynamic | JavaScript, Bootstrap, REST APIs

- Developed a responsive travel web application supporting dynamic search, filtering, and API-driven content rendering.
- Integrated REST APIs and localStorage functionality to improve user interaction and data persistence workflows.
- Enhanced frontend responsiveness and optimized cross-device compatibility using Bootstrap and modular JavaScript logic.
- Implemented interactive UI components and dynamic rendering techniques for improved usability and application performance.

PrepWise - Interview Preparation Platform (Ongoing) | HTML, CSS, JavaScript, Vercel

- Developing an interview preparation platform providing structured learning resources, preparation materials, and practice-based content organization.
- Implemented responsive UI architecture with dark/light theme functionality and mobile-friendly navigation workflows.
- Designed modular frontend sections to improve accessibility, user experience, and maintainability across devices.
- Deploying and optimizing the platform using Vercel for scalable and seamless frontend hosting.

Portfolio Website | HTML, CSS, JavaScript

- Designed and deployed a responsive personal portfolio website showcasing technical projects, engineering skills, and development experience.
- Improved UI/UX accessibility, frontend responsiveness, and structured project presentation across multiple device resolutions.
- Optimized website performance and layout consistency using modern frontend design principles.

EDUCATION

Crio.Do- SkillQ GenAI Powered Full Stack Development Fellowship (Ongoing)

KLS Gogte Institute of Technology, Belagavi

Bachelor of Engineering (B.E.) – Electronics & Communication Engineering | CGPA: 6.9 | 2020- Feb 2025

ACHIEVEMENTS & LEADERSHIP

- Presented research paper at BARC, Mumbai during an international technical conference.
- Recognized at national and international level technical events and presentation competitions.
- NSS Advisory Member at KLS GIT; led and managed 100+ volunteers across multiple social initiatives and organizational activities.
- Represented college in technical, leadership, and collaborative event-based activities.
